Continuation of Disposition of Claims: Claims withdrawn from consideration are:

2-4,6-8,10-12,14-16,18-20,22-24,26-28,30-32,34-36,38-40,42-44,46-48,50-52,54-56,58-60,62-64,66-68,70-72,74-76,78-80,82-84,86-88,90-92,94-96 and 98-100.

DETAILED ACTION

1. The submission of the Request for Reconsideration filed on 07/14/05 is acknowledged.
No claims have been amended.
2. The Applicant's remarks regarding JP 2001-266724 are correct. The JP 2001-266724 was referred to in the outstanding rejection.
3. The claims are rejected for the same reasons as presented in the outstanding rejection (see non-final Office action mailed on 04/13/05).

Response to Arguments

4. Applicant's arguments have been fully considered but they are not persuasive. The main thrust of the arguments is directed to the content of Bi in the alloys of JP 2001-266724 and of present invention. The Applicant contends that ranges of Bi are not overlapping, but rather adjacent, thus the Applicant concludes that it would not have been obvious to an artisan in the relevant art at the time the invention was made to adjust ranges of JP 2001-266724 in order to arrive to the claimed ranges.

While agreeing with the Applicant that the ranges are adjacent, nevertheless the Examiner believes that this does not change the scope of the rejection, since it has been held that

Art Unit: 2835

a prima facie case of obviousness exists when the claimed range and the prior art range do not overlap but are close enough such that one skilled in the art would have expected them to have the same properties. See *In re Peterson*, 65 USPQ2d 1379 (CA FC 2003) citing *Titanium Metals Corp. v. Banner*, 778 F.2d 775, 783, 227 USPQ 773, 779 (Fed. Cir. 1985) (concluding that a claim directed to an alloy containing “0.8% nickel, 0.3% molybdenum, up to 0.1% maximum iron, balance titanium” would have been prima facie obvious in view of a reference disclosing alloys containing 0.75% nickel, 0.25% molybdenum, balance titanium and 0.94% nickel, 0.31% molybdenum, balance titanium).

The normal desire of scientists or artisans to improve upon what is already generally known provides the motivation to determine where in a disclosed set of percentage ranges is the optimum combination of percentages. See *In re Boesch*, 617 F.2d 272, 276, 205 USPQ 215, 219 (CCPA 1980) (“[D]iscovery of an optimum value of a result effective variable in a known process is ordinarily within the skill of the art.”)

As such, the outstanding rejection of the claims is believed to be proper and is maintained herein.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 2835

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
